2 O,

1. The gratification of the senses or of the mind; agreeable sensations or emotions; the excitement, relish or happiness produced by enjoyment or the expectation of good; opposed to *pain*. We receive *pleasure* from the indulgence of appetite; from the view of a beautiful landscape; from the harmony of sounds; from agreeable society; from the expectation of seeing an absent friend; from the prospect of gain or success of any kind. *Pleasure*, bodily and mental, carnal and spiritual, constitutes the whole of positive happiness, as *pain* constitutes the whole of misery.

Pleasure is properly positive excitement of the passions or the mind; but we give the name also to the absence of excitement, when that excitement is painful; as when we cease to labor, or repose after fatigue, or when the mind is tranquilized after anxiety or agitation.

Pleasure is susceptible of increase to any degree; but the word when unqualified, expresses less excitement or happiness than *delight* or *joy*.

1. Something put in pawn; that which is deposited with another as security for the repayment of money borrowed, or for the performance of some agreement or obligation; a pawn. 2. Any thing given or considered as a security for the performance of an act. Thus a man gives his word or makes a promise to another, which is received as a *pledge* for fulfillment. 3. A surety; a hostage. Raleigh. Dryden.

4. In law, a gage or security real or personal, given for the repayment of money. It is of two kinds; *vadium vivum*, a *living pledge*, as when a man borrows money and grants an estate to be held by the pledgee, till the rents and profits shall refund the money, in which case the land or pledge is said to be *living*; or it is *vadium mortuum*, a *dead pledge*, called a *mortgage*. [See *Mortgage*.] Blackstone.

5. In law, bail; surety given for the prosecution of a suit, or for the appearance of a defendant, or for restoring goods taken in distress and replevied. 4. To invite to drink by accepting the cup or health after another. Johnson. Or to warrant or be surety for a person that he shall receive no harm while drinking, or from the draught; a practice which originated among our ancestors in their rude state, and which was intended to secure the person from being stabbed while drinking, or from being poisoned by the liquor. In the first case, a by-stander *pledges* the person drinking; in the latter, the person drinking *pledges* his guest by drinking first, and then handing the cup to his guest. The latter practice is frequent among the common people in America to this day; the owner of the liquor taking the cup says to his friend, *I pledge you*, and drinks, then hands the cup to his

guest; a remarkable instance of the power of habit, as the reason of the custom has long since ceased.

1. The finest species of earthen ware, originally manufactured in China and Japan, but now made in several European countries. All earthen wares which are white and semi-transparent, are called porcelains, but they differ much in their fineness and beauty. The porcelain of China is said to be made of two species of earth, the petuntse, which is fusible, and the kaolin, which is not fusible, or not with the degree of heat which fuses the petuntse, and that in porcelain the substances are only semi-vitrified, or one substance only is vitrified, the other not. Hence it is concluded that porcelain is an intermediate substance between earth and glass. Hence the second degree of fusibility, of which *emollescence* is the first, is called by Kirwan the *porcelain state*.

A *porism* is defined, "a proposition affirming the possibility of finding such conditions as will render a certain problem indeterminate or capable of innumerable solutions." It is not a theorem, nor a problem, or rather it includes both. It asserts that a certain problem may become indeterminate, and so far it partakes of the nature of a theo-

In the modern law of nations, the right of *postliminy* is that by virtue of which, persons and things taken by an enemy in war, are restored to their former state, when coming again under the power of the nation to which they belonged. The sovereign of a country is bound to protect the person and the property of his subjects; and a subject who has suffered the loss of his property by the violence of war, on being restored to his country, can claim to be re-established in all his rights, and to recover his property. But this right does not extend, in all cases, to personal effects or movables, on account of the difficulty of ascertaining their identity.

POWER, *n.* [*Fr. pouvoir*; *Norm. povare*; from the root of *Sp. & Port. poder*, *It. potere*; or rather the same word varied in orthography. The Latin has *posse*, *possum*, *potes*, *potentia*. The primary sense of the verb is to strain, or exert force.]

1. In a philosophical sense, the faculty of doing or performing any thing; the faculty of moving or of producing a change in something; ability or strength. A man raises his hand by his own *power*, or by *power* moves another body. The exertion of *power* proceeds from the will, and in strictness, no being destitute of will or intelligence, can exert *power*. Power in man is *active* or *speculative*. *Active power* is that which moves the body; *speculative power* is that by which we see, judge, remember, or in general, by which we think.

Power may exist without exertion. We have *power* to speak when we are silent.

Locke. Reid.

Power has been distinguished also into *active* and *passive*, the power of *doing* or *moving*, and the power of *receiving* impressions or of *suffering*. In strictness, *passive power* is an absurdity in terms. To say that gold has a *power* to be melted, is improper language, yet for want of a more appropriate word, *power* is often used in a passive sense, and is considered as two-fold; viz. as able to *make* or able to *receive* any change. *Cyc.*

2. Force; animal strength; as, the *power* of the arm, exerted in lifting, throwing or holding.

3. Force; strength; energy; as, the *power* of the mind, of the imagination, of the fancy. He has not *powers* of genius adequate to the work.

4. Faculty of the mind, as manifested by a particular mode of operation; as, the *power* of thinking, comparing and judging; the reasoning *powers*.

5. Ability, natural or moral. We say, a man has the *power* of doing good; his property gives him the *power* of relieving the distressed; or, he has the *power* to persuade others to do good; or, it is not in his *power* to pay his debts. The moral *power* of man is also his *power* of judging or discerning in moral subjects.

6. In *mechanics*, that which produces motion or force, or which may be applied to produce it. Thus the inclined plane is called a mechanical *power*, as it produces motion, although this in reality depends on gravity. The wheel and axle, and the lever, are mechanical *powers*, as they may be applied to produce force. These *powers* are also called *forces*, and they are of two kinds, *moving power*, and *sustaining power*.

7. Force. The great *power* of the screw is of extensive use in compression. The *power* of steam is immense.

8. That quality in any natural body which produces a change or makes an impression on another body; as, the *power* of medicine; the *power* of heat; the *power* of sound.

9. Force; strength; momentum; as, the *power* of the wind, which propels a ship or overturns a building.

10. Influence; that which may move the mind; as, the *power* of arguments or of persuasion.

11. Command; the right of governing, or actual government; dominion; rule; sway; authority. A large portion of Asia is under the *power* of the Russian emperor. The *power* of the British monarch is limited by law. The *powers* of government are legislative, executive, judicial, and ministerial.

Power is no blessing in itself, but when it is employed to protect the innocent. *Swift.*

Under this sense may be comprehended civil, political, ecclesiastical, and military *power*.

12. A sovereign, whether emperor, king or governing prince or the legislature of a state; as, the *powers* of Europe; the great *powers*; the smaller *powers*. In this sense, the state or nation governed seems to be included in the word *power*. Great Britain is a great naval *power*.

It is sometimes synonymous with *possible*, but the words differ in this: *possible* is applied to that which might be performed, if the necessary powers or means could be obtained; *practicable* is limited in its application to things which are to be performed by the means given, or which may be applied. See the Verb.]

1. Commendation bestowed on a person for his personal virtues or worthy actions, on meritorious actions themselves, or on any thing valuable; approbation expressed in words or song. *Praise* may be expressed by an individual, and in this circumstance differs from *fame*, *renown*, and *celebrity*, which are the expression of the approbation of numbers, or public commendation. It appears that *praise*, *price*, *prize*, are all from one root, the primary sense of which is to lift, to raise, or rather to strain. So from L. *tollo*, *extollo*, we have *extol*. Now in Dan. *roser*, Sw. *rosa*, signifies to praise, and it may be questioned whether this is *praise* without a prefix. The Latin *pretium*, W. *príd*, is probably from the same root, denoting that which is taken for a thing sold, or the rising or amount, as we use *high*; a *high* value or price; corn is

high. In Pers. *افراز* *afaraz*, is high,

lofty; *افرازیدن* *afrazidan*, to extol.

Qu. Fr. *prôner*, for *prosner*.]

So in Port. *brincar*, to sport; Sp. *id.* to

leap. These are evidently the Ar. *برق* to

adorn, to lighten. *Prink* is probably from the same root.]

in Great Britain to decide legal questions in the last resort. It is the *prerogative* of the house of commons to determine the validity of all elections of their own members. But when the time is mentioned, we use the imperfect tense so called; as, "I wrote to my correspondent yesterday." This word seems to be connected with *priaud*, appropriate, proper, fitting, whence *priodi*, to render appropriate, to espouse or marry, and *priodverg*, a *bride*. The promise of a visit to my neighbor, gives him a right to expect it, and I am bound in honor and civility to perform the *promise*. Of such a *promise* human laws have no cognizance; but the fulfillment of it is one of the minor moralities, which civility, kindness and strict integrity require to be observed.

2. In *law*, a declaration, verbal or written, made by one person to another for a good or valuable consideration, in the nature of a covenant, by which the promiser binds himself, and as the case may be, his *legal representatives*, to do or forbear some act; and gives to the promisee a legal right to demand and enforce a fulfillment.

A promise may be *absolute* or *conditional*; *lawful* or *unlawful*; *express* or *implied*. An *absolute promise* must be fulfilled at all events. An *express promise*, is one expressed in words or writing. An *implied promise*, is one which reason and justice dictate. If I hire a man to perform a day's labor, without any declaration that I will pay him, the law presumes a *promise* on my part that I will give him a reasona-

1. Trial; essay; experiment; any effort, process or operation that ascertains truth or fact. Thus the quality of spirit is ascertained by *proof*; the strength of gunpowder, of fire-arms and of cannon is determined by *proof*; the correctness of operations in arithmetic is ascertained by *proof*.

2. In law and logic, that degree of evidence which convinces the mind of the certainty of truth or fact, and produces belief. *Proof* is derived from personal knowledge, or from the testimony of others, or from conclusive reasoning. *Proof* differs from *demonstration*, which is applicable only to those truths of which the contrary is inconceivable.

This has neither evidence of truth, nor *proof* sufficient to give it warrant.

Hooker.

3. Firmness or hardness that resists impression, or yields not to force; impenetrability of physical bodies; as, a wall that is of *proof* against shot.

See arms of *proof*.

PROPAGATE, *v. t.* [L. *propago*; It. *propagare*; G. *pfropfen*, a stopple; *pfropfen*, to thrust, also to graft. See *Prop*. The Latin noun *propago*, is the English *prop*, and the termination *ago*, as in *cartilago*, &c. The sense of the noun is that which is set or thrust in.]

1. Peculiar; naturally or essentially belonging to a person or thing; not common. That is not *proper*, which is common to many. Every animal has his *proper* instincts and inclinations, appetites and habits. Every muscle and vessel of the body has its *proper* office. Every art has its *proper* rules. Creation is the *proper* work of an Almighty Being.

2. Particularly suited to. Every animal lives in his *proper* element.
 3. One's own. It may be joined with any possessive pronoun; as, *our proper* son.

Shak.
Glanville.
Dryden.

 Now learn the difference at *your proper* cost.

[NOTE. *Own* is often used in such phrases; "at *your own proper* cost." This is really tautological, but sanctioned by usage, and expressive of emphasis.]

4. Noting an individual; pertaining to one of a species, but not common to the whole; as, a *proper* name. *Dublin* is the *proper* name of a city.

5. Fit; suitable; adapted; accommodated. A thin dress is not *proper* for clothing in a cold climate. Stimulants are *proper* remedies for debility. Gravity of manners is very *proper* for persons of advanced age.

2. Tallness. [*Not in use.*]

PROPERTY, *n.* [This seems to be formed directly from *proper*; if not, it is contracted. The Latin is *proprietas*, Fr. *propriété*, from which we have *propriety*.]

1. A peculiar quality of any thing; that which is inherent in a subject, or naturally essential to it; called by logicians an *essential mode*. Thus color is a *property* of light; extension and figure are *properties* of bodies.

2. An acquired or artificial quality; that which is given by art or bestowed by man. The poem has the *properties* which constitute excellence.

3. Quality; disposition.

It is the *property* of an old sinner to find delight in reviewing his own villainies in others.

4. The exclusive right of possessing, enjoying and disposing of a thing; ownership. In the beginning of the world, the Creator gave to man dominion over the earth, over the fish of the sea and the fowls of the air, and over every living thing. This

is the foundation of man's *property* in the earth and in all its productions. Prior occupancy of land and of wild animals gives to the possessor the *property* of them. The labor of inventing, making or producing any thing constitutes one of the highest and most indefeasible titles to *property*. *Property* is also acquired by inheritance, by gift or by purchase. *Property* is sometimes held in common, yet each man's right to his share in common land or stock is exclusively his own. One man may have the *property* of the soil, and another the right of use, by prescription or by purchase.

5. Possession held in one's own right.

Dryden.
 6. The thing owned; that to which a person has the legal title, whether in his possession or not. It is one of the greatest blessings of civil society that the *property* of citizens is well secured.

7. An estate, whether in lands, goods or money; as, a man of large *property* or small *property*.

8. An estate; a farm; a plantation. In this sense, which is common in the United States and in the West Indies, the word has a plural.

The still-houses on the sugar plantations, vary in size, according to the fancy of the proprietor or the magnitude of the *property*.

Edwards, West Indies.

I shall confine myself to such *properties* as fall within the reach of daily observation. *Ib.*

9. Nearness or right.

Here I disclaim all my paternal care,
 Propinquity and *property* of blood. *Shak.*

10. Something useful; an appendage; a theatrical term.

I will draw a bill of *properties*. *Shak.*
 High pomp and state are useful *properties*.

Dryden.

11. Propriety. [*Not in use.*] *Camden.*

Literary property, the exclusive right of printing, publishing and making profit by one's own writings. No right or title to a thing can be so perfect as that which is created by a man's own labor and invention. The exclusive right of a man to his literary productions, and to the use of them for his own profit, is entire and perfect, as the faculties employed and labor bestowed are entirely and perfectly his own. On what principle then can a legislature or a court determine that an author can enjoy only a *temporary property* in his own productions? If a man's right to his own productions in writing is as perfect as to the productions of his farm or his shop, how can the former be abridged or limited, while the latter is held without limitation? Why do the productions of manual labor rank higher in the scale of rights or *property*, than the productions of the intellect?

PROPERTY, *v. t.* To invest with qualities, or to take as one's own; to appropriate.

[*An awkward word and not used.*] *Shak.*

Plin. Nat. Hist.

This account of the propolis may not be perfectly correct, as authors do not agree in their descriptions of it.

PROPO'NENT, *n.* [*L. proponens; pro and pono, to place.*]

One that makes a proposal, or lays down a proposition. *Dryden.*

PROPORTION, *n.* [*L. proportio; pro and portio, part or share. See Portion.*]

1. The comparative relation of any one thing to another. Let a man's exertions be in *proportion* to his strength.

2. The identity or similitude of two ratios. *Proportion* differs from *ratio*. *Ratio* is the relation which determines the quantity of one thing from the quantity of another, without the intervention of a third. Thus the ratio of 5 and 10 is 2: the ratio of 8 and 16 is 2. *Proportion* is the sameness or likeness of two such relations. Thus 5 is to 10, as 8 to 16, or A. is to B., as C. is to D.; that is, 5 bears the same relation to 10, as 8 does to 16. Hence we say, such numbers are in *proportion*. *Encyc.*

Proportion, in *mathematics*, an equality of ratios. *Day.*

The term *proportion* is sometimes improperly used for *ratio*. The ratio between two quantities, is expressed by the quotient of one divided by the other: thus, the ratio of 10 to 5 is 2, and the ratio of 16 to 8 is 2. These two equal ratios constitute a *proportion*, which is expressed by saying, 10 is to 5 as 16 is to 8; or more concisely, 10 : 5 :: 16 : 8. [*See Ratio.*] *D. Olmsted.*

3. In *arithmetic*, a rule by which, when three numbers are given, a fourth number is found, which bears the same relation to the third as the second does to the first; or a fourth number is found, bearing the same relation to the second as the first does to the third. The former is called *direct*, and the latter, *inverse proportion*.

4. Symmetry; suitable adaptation of one part or thing to another; as, the *proportion* of one limb to another in the human body; the *proportion* of the length and breadth of a room to its height.

Harmony, with every grace,

Plays in the fair *proportions* of her face.

Mrs. Carter.

5. Equal or just share; as, to ascertain the *proportion* of profit to which each partner in a company is entitled.

6. Form; size. [*Little used.*] *Davies.*

7. The relation between unequal things of the same kind, by which their several parts correspond to each other with an equal augmentation and diminution, as in reducing and enlarging figures. *Encyc.*

[This more properly belongs to *ratio*.]

Harmonical or musical proportion, is when, of three numbers, the first is to the third as the difference of the first and second to the difference of the second and third. Thus 2. 3. 6. are in *harmonical proportion*; for 2 is to 6 as 1 to 3. So also four numbers are *harmonical*, when the first is to the fourth, as the difference of the first

and second is to the difference of the third and fourth. Thus, 24. 16. 12. 9. are *harmonical*, for 24 : 9 :: 8 : 3. *Encyc.*

Arithmetical and geometrical proportion. [*See Progression, No. 4.*]

In the loss of an object, we do not *proportion* our grief to its real value, but to the value our fancies set upon it. *Addison.*

2. To form with symmetry or suitableness, as the parts of the body.

PROPORTIONABLE, *a.* That may be proportioned or made proportional. This is the true sense of the word; but it is erroneously used in the sense of *proportional*, being in *proportion*; having a due comparative relation; as, infantry with a *proportionable* number of horse.

PROPORTIONABLY, *adv.* According to proportion or comparative relation; as, a large body, with limbs *proportionably* large.

PROPORTIONAL, *a.* [*It. proporzionale; Fr. proportionnel.*]

In *pharmacy*, medicines are compounded of certain *proportional* quantities of ingredients. PROSECUTE, *v. t.* [*L. prosecutus, sequor; pro and sequor, to follow, Eng. to seek. See Essay.*]

1. To follow or pursue with a view to reach, execute or accomplish; to continue en-

deavors to obtain or complete; to continue efforts already begun; as, to *prosecute* a scheme; to *prosecute* an undertaking. The great canal in the state of New York has been *prosecuted* with success.

That which is morally good is to be desired and *prosecuted*. *Wilkins.*

This word signifies either to *begin* and *carry on*, or simply to *continue* what has been begun. When I say, "I have devised a plan which I have not the courage or means to *prosecute*," the word signifies to *begin* to *execute*. When we say, "the nation began a war which it had not means to *prosecute*," it signifies to *continue* to *carry on*. The latter is the genuine sense of the word, but both are well authorized. We *prosecute* any work of the hands or of the head. We *prosecute* a purpose, an enterprise, a work, studies, inquiries, &c.

3. To accuse of some crime or breach of law, or to pursue for redress or punishment, before a legal tribunal; as, to *prosecute* a man for trespass or for a riot. It is applied to civil suits for damages, as well as to criminal suits, but not to suits for debt. We never say, a man *prosecutes* another on a bond or note, or in assumpsit; but he *prosecutes* his right or claim in an action of debt, detinue, trover or assumpsit. So we say, a man *prosecutes* another for assault and battery, for a libel or for slander, or for breaking his close. In these cases, *prosecute* signifies to *begin* and to *continue* a suit. The attorney-general *prosecutes* offenders in the name of the king or of the state, by information or indictment.

Prosecute differs from *persecute*, as in law it is applied to the legal proceedings only, whereas *persecute* implies cruelty, injustice or oppression.

PROSECUTED, *pp.* Pursued, or begun and carried on for execution or accomplishment, as a scheme; pursued for redress or punishment in a court of law, as a person; demanded in law, as a right or claim.

PROSECUTING, *ppr.* Pursuing, or beginning and carrying on for accomplishment; pursuing for redress or punishment; suing for, as a right or claim.

2. The institution and carrying on of a suit in a court of law or equity, to obtain some right, or to redress and punish some wrong. The *prosecution* of a claim in chancery is very expensive. Malicious *prosecutions* subject the offender to punishment.

3. The institution or commencement and continuance of a criminal suit; the process of exhibiting formal charges against an offender before a legal tribunal, and pursuing them to final judgment; as, *prosecutions* of the crown or of the state by the attorney- or solicitor-general. *Prose-*

Thus a Gentile converted to Judaism is a *proselyte*; a Pagan converted to Christianity is a *proselyte*; and we speak familiarly of *proselytes* to the theories of Brown, of Black, or of Lavoisier. [qu. G. D. & Sw. *proviant*, provisions:] It. *provianda*, victuals; Ir. *proantain*, provender. The Italian *provianda* is probably composed of *pro* and *vivanda*, victuals, from *vivere*, L. *vivo*, to live, and from *vivanda* the French have *viande*, Eng. *viand*. Whether the French *proviende* and Norm. *provender* are from the same source, may be doubted. The German *proviant* may be formed from the L. *provideo*, Sp. *proveer*, Port. *prover*. Qu. L. *proventus*. It is said that *provend*, *provender*, originally signified a vessel containing a measure of corn daily given to a horse or other beast. rowful; Goth. *frods*, prudent; Gr. *φραδν*, prudence; Goth. *frathi*, mind, intellect; *frathyan*, to be wise, to understand. The Goth. *frod* signifies both wise, prudent, and broken; D. *vroed*, prudent. We see that *prude*, *prudent*, and *proud* are from the same root. The sense of *brillie* would indicate that these words belong to the same family with the Dan. *bryder*, to break; and the radical elements are the same. The Welsh *pruz* is from tending out or reaching, hence *pryder*, anxiety, a stretching of the mind. The sense of *prude* is probably from stretching, straitness, stiffness; and the sense of *wise* is derivative. *Prudence* is from the same root, implying care, a tension of mind.]

PUNISHER, *n.* One that inflicts pain, loss or other evil for a crime or offense.

Milton.

PUNISHING, *ppr.* Afflicting with pain, penalty or suffering of any kind, as the retribution of a crime or offense.

PUNISHMENT, *n.* Any pain or suffering inflicted on a person for a crime or offense, by the authority to which the offender is subject, either by the constitution of God or of civil society. The *punishment* of the faults and offenses of children by the parent, is by virtue of the right of government with which the parent is invested by God himself. This species of punishment is *chastisement* or *correction*. The *punishment* of crimes against the laws is inflicted by the supreme power of the state in virtue of the right of government, vested in the prince or legislature. The right of *punishment* belongs only to persons clothed with authority. Pain, loss or evil willfully inflicted on another for his crimes or offenses by a private unauthorized person, is *revenge* rather than *punishment*.

Some *punishments* consist in exile or transportation, others in loss of liberty by imprisonment; some extend to confiscation by forfeiture of lands and goods, others induce a disability of holding offices, of being heirs and the like.

Blackstone.

Divine *punishments* are doubtless designed to secure obedience to divine laws, and uphold the moral order of created intelligent beings.

The rewards and *punishments* of another life, which the Almighty has established as the enforcements of his law, are of weight enough to determine the choice against whatever pleasure or pain this life can show.

This word seems to be considered by Blackstone as formed from the *L. perquisitio*. This is an error. The word is from the root of *chase*; *pourchasser* is to pursue to the end or object, and hence to obtain. In law Latin, *purchase*, the noun, was written *purchacium*. The legal use of the word in obtaining writs, shows best its true origin; to *purchase* a writ, is to *sue out* a writ, that is, to seek it out; for *sue*, *seek*, and *L. sequor*, are all of one origin, and synonymous with *chase*. Q.

Q U A

Q IS the seventeenth letter of the English Alphabet; an articulation borrowed from the oriental *koph* or *goph*, Ch. and Heb. *p*, Samaritan *p*, Syriac *q*, Arabic *qaf*. It is supposed to be an articulation more deeply guttural than that of *K*; indeed it might have been pronounced as we pronounce *qu*; for we observe that in the Latin language, from which the moderns have borrowed the letter, it is always followed by *u*, as it is in English. This letter is not in the Greek alphabet. In our mother tongue, the Anglo-Saxon, this letter is not used; but in the place of *qu*, *cu*, or more generally, *cw* is used; as in epic, quick; open, queen. This letter is superfluous; for *ku* or *koo*, in English, have precisely the same sounds as *qu*. It is alleged that in expressing *q*, the cheeks are contracted, and the lips put into a canular form, for the passage of the breath; circumstances which distinguish it from *k*. This appears to be a mistake. This position of the organs is entirely owing to the following letter *u*; and *question* and *question* are pronounced precisely alike, and with the same configuration of the organs. For *qu* in English, the Dutch use *kw*, the Germans *qu*, the Swedes and the Danes *qv*, which answer to our *kw*. The Gothic has a character which answers to *qu*. It appears then that *q* is precisely *k*, with this difference in use, that *q* is always followed by *u* in English, and *k* is not. *Q* never ends an English word. Its name *cue*, is said to be from the French *queue*, a tail. As a numeral, *Q* stands for 500, and with a dash, *Q̄*, for 500,000. Used as an abbreviation, *Q.* stands for *quantity* or *quantum*; as, among physicians, *q. pl. quantum placet*, as much as you please; *q. s. quantum sufficit*, as much as is required, or as is sufficient. Among mathematicians, *Q. E. D.* stands for *quod erat demonstrandum*, which was to be demonstrated; *Q. E. F. quod erat faciendum*, which was to be done. In the notes of the ancients, *Q.* stands for *Quintus*, or *Quintius*; *Quint.* for *Quintilius*; and *Quæ.* for *quæstor*. In English, *Q.* is an abbreviation for *question*. **QUAB**, *n.* [G. *quappe*; D. *kwab*; Dan. *qvabbe*.] A fish of Russian rivers, which delights in clear water. *Dict. Nat. Hist.* **QUACHILTO**, *n.* A Brazilian fowl of the moor-hen kind, of a fine black color variegated with white. Its voice resembles the crowing of a cock. *Dict. Nat. Hist.*

چند *chand*, how much; چندی *chandi*, quantity.]

1. That property of any thing which may be increased or diminished. *Cheyne. Johnson.*

This definition is defective, and as applicable to many other properties as to quantity. A definition strictly philosophical cannot be given. In common usage, *quantity* is a mass or collection of matter of indeterminate dimensions, but consisting of particles which cannot be distinguished, or which are not customarily distinguished, or which are considered in the aggregate. Thus we say, a *quantity* of earth, a *quantity* of water, a *quantity* of air, of light, of heat, of iron, of wood, of timber, of corn, of paper. But we do not say, a *quantity* of men, or of horses, or of houses; for as these are considered as separate individuals or beings, we call an assemblage of them, a *number* or *multitude*.

In algebra, quantities are *known* and *unknown*. *Known quantities* are usually represented by the first letters of the alphabet, as *a, b, c*, and *unknown quantities* are expressed by the last letters, *x, y, z*, &c. Letters thus used to represent quantities are themselves called *quantities*. A simple quantity is expressed by one term, as *+a*, or *-abc*; a compound is expressed by more terms than one, connected by the signs, *+* plus, or *-* minus, as *a+b*, or *a-b+c*. Quantities which

have the sign *+* prefixed, are called *positive* or *affirmative*; those which have the sign *-* prefixed are called *negative*. *Day's Algebra.*

R.

R

R IS the eighteenth letter of the English Alphabet, and an articulation *sui generis*, having little or no resemblance in pronunciation to any other letter. But from the position of the tongue in uttering it, it is commutable with *l*, into which letter it is changed in many words by the Spaniards and Portuguese, and some other nations; as *l* is also changed into *r*. It is numbered among the liquids and semi-vowels, and is sometimes called the canine letter. It is uttered with a guttural extrusion of the breath, and in some words, particularly at the end or after a labial and a dental letter, with a sort of quivering motion or slight jar of the tongue. Its English uses, which are uniform, may be understood by the customary pronunciation of *rod*, *room*, *rose*, *bar*, *bare*, *barren*, *disturb*, *catarrh*, *free*, *brad*, *pride*, *drip*, *drag*, *drown*.
 In words which we have received from the Greek language, we follow the Latins, who wrote *h* after *r*, as the representative of the aspirated sound with which this letter was pronounced by the Greeks. It is the same in the Welsh language. But as the letter is not aspirated in English, *h* is entirely superfluous; *rhapsody*, *rheum*, *rhetoric* being pronounced *rapsody*, *reum*, *retoric*.
 As an abbreviation, *R.* in English, stands for *rex*, king, as *George R.*
 In the notes of the ancients, *R.* or *RO.* stands for *Roma*; *R. C.* for *Romana civitas*; *R. G. C.* for *rei gerendæ causa*; *R. F. E. D.* for *recte factum et dictum*; *R. G. F.* for *regis filius*; *R. P.* *respublica*, or *Romani principes*.
 As a numeral, *R.* in Roman authors, stands

for 80, and with a dash over it, *R̄*, for 80,000. But in Greek, *ρ*, with a small mark over it, thus *ρ̄*, signifies 100, and with the same mark under it, it denoted 1000 × 100, or 100,000. In Hebrew, *ר* denoted 200, and with two horizontal points over it, *ר̄*, 1000 × 200, or 200,000.
 Among physicians, *R.* stands for *recipe*, take.
RA, as an inseparable prefix or preposition, is the Latin *re*, coming to us through the Italian and French, and primarily signifying *again*, *repetition*. [See *Re*.]
RABA'TE, *v. t.* [Fr. *rabattre*; It. *rabbattere*; *ra* and *battere*, *battere*, to beat. See *Beat* and *Abate*.]

Relief is of three kinds; high relief [*alto rilievo*]; low relief [*basso rilievo*]; and demi relief [*demi rilievo*]. The difference is in the degree of projecture. *High relief* is formed from nature, as when a figure projects as much as the life. *Low relief* is when the figure projects but little, as in medals, festoons, foliages and other ornaments. *Demi relief* is when one half of the figure rises from the plane. *Encyc.*
 5. In *painting*, the appearance of projection, or the degree of boldness which a figure exhibits to the eye at a distance.
 6. In *feudal law*, a fine or composition which the heir of a tenant, holding by knight's service or other tenure, paid to the lord at the death of the ancestor, for the privilege of taking up the estate which, on strict feudal principles, had lapsed or fallen to the lord on the death of the tenant. This relief consisted of horses, arms, money and the like, the amount of which was originally arbitrary, but afterwards fixed at a certain rate by law. It is not payable, unless the heir at the death of his ancestor had attained to the age of twenty-one years. *Blackstone. Encyc.*
 7. A remedy, partial or total, for any wrong suffered; redress; indemnification. He applied to chancery, but could get no *relief*. He petitioned the legislature and obtained *relief*.

1. To free, wholly or partially, from pain, grief, want, anxiety, care, toil, trouble, burden, oppression, or any thing that is considered to be an evil; to ease of any thing that pains the body or distresses the mind. Repose *relieves* the wearied body; a supply of provisions *relieves* a family in want; medicines may *relieve* the sick man, even when they do not cure him. We all desire to be *relieved* from anxiety and from heavy taxes. Law or duty, or both, re-

- quire that we should *relieve* the poor and destitute.
2. To alleviate or remove; as when we say, to *relieve* pain or distress; to *relieve* the wants of the poor.
 3. To dismiss from a post or station, as sentinels, a guard or ships, and station others in their place. Sentinels are generally *relieved* every two hours; a guard is usually *relieved* once in twenty-four hours.
 4. To right; to ease of any burden, wrong or oppression by judicial or legislative interposition, by the removal of a grievance, by indemnification for losses and the like.
 5. To abate the inconvenience of any thing by change, or by the interposition of something dissimilar. The moon *relieves* the luster of the sun with a milder light. The poet must not encumber his poem with too much business, but sometimes *relieve* the subject with a moral reflection. *Addison*.

- RELIGION, *n.* *relij'on*. [Fr. & Sp. *religion*; It. *religione*; L. *religio*, from *religo*, to bind anew; *re* and *ligo*, to bind. This word seems originally to have signified an oath or vow to the gods, or the obligation of such an oath or vow, which was held very sacred by the Romans.]
1. Religion, in its most comprehensive sense, includes a belief in the being and perfections of God, in the revelation of his will to man, in man's obligation to obey his commands, in a state of reward and punishment, and in man's accountableness to God; and also true godliness or piety of life, with the practice of all moral duties. It therefore comprehends theology, as a system of doctrines or principles, as well as practical piety; for the practice of moral duties without a belief in a divine lawgiver, and without reference to his will or commands, is not religion.
 2. *Religion*, as distinct from *theology*, is godliness or real piety in practice, consisting in the performance of all known duties to God and our fellow men, in obedience to divine command, or from love to God and his law. *James i.*
- Religion* will attend you—as a pleasant and

useful companion, in every proper place and every temperate occupation of life.

Buckminster.

3. *Religion*, as distinct from *virtue*, or *morality*, consists in the performance of the duties we owe directly to God, from a principle of obedience to his will. Hence we often speak of *religion* and *virtue*, as different branches of one system, or the duties of the first and second tables of the law.

Let us with caution indulge the supposition, that morality can be maintained without *religion*.

Washington.

4. Any system of faith and worship. In this sense, religion comprehends the belief and worship of pagans and Mohammedans, as well as of Christians; any religion consisting in the belief of a superior power or powers governing the world, and in the worship of such power or powers. Thus we speak of the *religion* of the Turks, of the Hindoos, of the Indians, &c. as well as of the Christian *religion*. We speak of *false religion*, as well as of *true religion*.
5. The rites of religion; in the plural.

1. To withdraw from; to leave; to quit. It may be to forsake or abandon, but it does not necessarily express the sense of the latter. The Spanish and Portuguese have the Latin word with a different prefix; Sp. *galardon*, a reward; *galardonar*, to reward; Port. *galardam*, *galadoar*. The Armoric has *garredon*, *garredoner*. 2. In *morals* and *religion*, just; equitable; accordant to the standard of truth and justice or the will of God. That alone is *right* in the sight of God, which is consonant to his will or law; this being the only perfect standard of truth and justice. In social and political affairs, that is *right* which is consonant to the laws and customs of a country, provided these laws and customs are not repugnant to the laws of God. A man's intentions may be *right*, though his actions may be wrong in consequence of a defect in judgment.

3. Fit; suitable; proper; becoming. In things indifferent, or which are regulated by no positive law, that is *right* which is best suited to the character, occasion or purpose, or which is fitted to produce some good effect. It is *right* for a rich man to dress himself and his family in expensive clothing, which it would not be *right* for a poor man to purchase. RIGHT, n. Conformity to the will of God, or to his law, the perfect standard of truth and justice. 2. Conformity to human laws, or to other human standard of truth, propriety or justice. When laws are definite, *right* and *wrong* are easily ascertained and understood. It is usual to consider this word as formed by contraction from the Latin *rotula*, a little wheel, from *rota*, W. *rhod*, a wheel. reach to a distance, to divine, to romance, to allegorize; *rhamantu*, to use figurative or high flown language, &c. The Welsh retains the signification of the oriental word from which *Rome* is derived, and indeed the sense of *romance* is evidently from the primitive sense of the root, rather than from the use of the Roman language. The Welsh use of the word proves also the correctness of the foregoing derivation of *Roma*, and overthrows the fabulous account of the origin of the word from Romulus or Remus. It is probable that this word is allied to *ramble*.]

S.

S A B

S, THE nineteenth letter of the English Alphabet, is a sibilant articulation, and numbered among the semi-vowels. It represents the hissing made by driving the breath between the end of the tongue and the roof of the mouth, just above the upper teeth. It has two uses; one to express a mere hissing, as in *sabbath*, *sack*, *sin*, *this*, *thus*; the other a vocal hissing, precisely like that of *z*, as in *muse*, *wise*, pronounced *mūze*, *wīze*. It generally has its hissing sound at the beginning of all proper English words, but in the middle and end of words, its sound is to be known only by usage. In a few words it is silent, as in *isle* and *viscount*.

In abbreviations, S. stands for *societas*, society, or *socius*, fellow; as, F.R.S. fellow of the Royal Society. In medical prescriptions, S.A. signifies *secundum artem*, according to the rules of art.

In the notes of the ancients, S. stands for *Sextus*; Sp. for *Spurius*; S.C. for *senatus consultum*; S.P.Q.R. for *senatus populusque Romanus*; S.S.S. for *stratum superstratum*, one layer above another alternately; S.V.B.E.E.Q.V. for *si vales, bene est, ego quoque valeo*.

This was originally the seventh day of the week, the day on which God rested from the work of creation; and this day is still observed by the Jews and some Christians, as the sabbath. But the Christian church very early begun and still continue to observe the first day of the week, in commemoration of the resurrection of Christ on that day, by which the work of redemption was completed. Hence it is often called the *Lord's day*. The heathen nations in the north of Europe dedicated this day to the *sun*, and hence their Christian descendants continue to call the day *Sunday*. But in the United States, Christians have to a great extent discarded the heathen name, and adopted the Jewish name *sabbath*.

From comparing this word and *sack*, a bag, in several languages, it appears that they are both from one root, and that the primary sense is to strain, pull, draw; hence *sack*, a bag, is a tie, that which is tied or drawn together; and *sack*, to pillage, is to pull, to strip, that is, to take away by violence. See Class Sg. No. 5. 15. 16. 18. 30. 74. 77. &c.]

To plunder or pillage, as a town or city. Rome was twice taken and *sacked* in the reign of one pope. In present usage, an outward and visible sign of inward and spiritual grace; or more particularly, a solemn religious ceremony enjoined by Christ, the head of the Christian church, to be observed by his followers, by which their special relation to him is created, or their obligations to him renewed and ratified. Thus baptism is called a *sacrament*, for by it persons are separated from the world, brought into Christ's visible church, and laid under particular obligations to obey his precepts. The eucharist or communion of the Lord's supper, is also a *sacrament*, for by commemorating the death and dying love of Christ, Christians avow their special relation to him, and renew their obligations to be faithful to their divine Master. When we use *sacrament* without any qualifying word, we mean by it,

5. In chemistry, a body compounded of an acid united to some base, which may be either an alkali, an earth, or a metallic oxyd. Accordingly, salts are alkaline, earthy, or metallic. Many compounds of this kind, of which common salt (muriate of soda) is the most distinguished, exist in nature; but most of these, together with many others not known in nature, have been formed by the artificial combination of their elements. Their entire number exceeds 2000. When the acid and base mutually saturate each other, so that the individual properties of each are lost, the compound is a *neutral* salt; when the acid predominates, it is a *super* salt; and when the base predominates, it is a *sub* salt. Thus we have a subcarbonate, a carbonate, and a supercarbonate of potash.
